

Simcoe Video Surveillance

Commercial Residential and Industrial Video Surveillance

Uniview 8MP 4K IP Eyeball Security Camera, 180°, IR 20M, PoE, 1.68mm

IPC3608SB-ADF16KM-IO

The Uniview 8MP HD Wide Angle Intelligent IR Fixed Eyeball Network Camera combines an ultra-wide 180° view from a 1.68mm lens with easy 'eyeball'-style adjustability for panoramic surveillance of external walls, parking lots, salesfloors and much more.

Dewarping can be adjusted from 1 to 9, adjusting video output to enable focusing on important surveillance zones. Smart features like smart intrusion and target classification minimize false alarms from debris or animals and automatically record and alarm when human or vehicle targets enter or exit an area.

Additional features like 120 dB true WDR and smart IR ensure crystal-clear, 8MP 4K (2160p) footage—day or night. Additional IP67 ingress protection enables year-round indoor or outdoor installation, while IK10 vandal resistance makes it ideal for public installation in high-traffic areas.

Accepts PoE or DC12V power supply (not included).
