

Simcoe Video Surveillance

Commercial Residential and Industrial Video Surveillance

PW2020-14T2G-IN features:

- 14 Ports 10/100, 2 Ports Gigabit and 2 Gigabit Uplink
- Uses CAT.5 network patch cords to support power for wireless AP/CPE and IP or PTZ cameras
- Blinking PoE power light blinks to determine receiving end power status - each blink is 2.7 watts
- PoE Watchdog AI to detect front-end PoE cameras and PD, along with automatic detection and restart
- automatic flip upload port - Auto MDI/MDIX
- Networking standard: IEEE802.3af/at/bt
- 6KV lightning protection and 8KV surge protection
- Overcurrent protection, over-voltage protection, over-temperature protection, Short circuit protection
- Anti-reverse connection
- The Max output port power is 60W - convenient for hi-power equipment
- Zero configuration power supply is automatically supplied to the adaptive equipment

The AI PoE Switch PW2020-14T2G-IN uses CAT.5 network patch cords to support power for wireless AP/CPE and IP camera/PTZ. It uses a zero-configuration feature, so the power supply is automatically supplied to the adaptive equipment. The built-in PoE power light blinks to determine the power status - each blink is 2.7 watts.

Other features include 6KV lightning protection, 8KV surge protection, anti-reverse connection, overcurrent protection, over-voltage protection, over-temperature protection, Short circuit protection.
