IPC3628 SERIES- OWL VIEW

BACK YARD - DAYTIME

BACK YARD NIGHT

Uniview 8MP 4K Colorhunter Turret Camera, Wise-ISP OwlView, Mic, 2.8mm

Uniview's OwlView Wise-ISP 5th generation night vision technology offers previously impossible full colour images at night. The technology is so impressive that it caused Internet comments claiming it was fake.

Now Owlview Wise-ISP technology is combined with 8MP 4K high resolution imaging!

The OwlView 8MP Colorhunter Turret is a PoE-powered, 2.8mm ultra-wide camera with Colorhunter and Wise ISP technology to ensure 24/7, vivid, full-colour images, day or night. 120dB true WDR technology ensures that images are recorded with balanced light, even when the camera is facing harsh daylight, ensuring that subjects are not shadowed or missing details.

IP67 weatherproof protection and supplemental white light allow for indoor and outdoor installation with up to 98 feet of additional, full-colour video—even in spaces with no to zero light sources like underground structures or server rooms. With up to 4MP of still-image resolution, and video resolution up to 1520p @ 25fps, the OwlView provides unparalleled quality of image in any environment or condition.
